EXPERIENCE

Neudesic

Aug 2015 - Present

Lead Web Developer, Product

- Successfully proposed and co-developed the stack that almost all sites are now running on. This stack allowed for 5x faster load times, 3x faster creation times, and resolved nearly all old bugs. The stack involves custom coded plugins/modules and themes for Wordpress, it utilizes PHP, AJAX, jQuery, and REST APIs.
- Changed the push process from live editing on production to local development on XAMPP, which then pushes to a shared Github repository, then uses deploy-bot to push to production.
- Currently working on getting the next iteration of our site to give a much better experience through a React.JS Headless Wordpress setup (using WP REST API).
- Currently working on a web application utilizing ReactJS, MeteorJS, and Elastic-Search to create a single hub for searching through organization documents which are stored in different places including CRM, Task Management, Company Social Media, etc..

ThomasTsai.com

Sep 2009 - Present

Web & Application Developer

- Built a website that pulls and pushes data from a Salesforce CRM setup
- Built a website for a world-class artist whose work was featured at the Vatican's international conference on autism
- Built wordpress themes and plugins for various clients
- Provides support to other developers and web designers for more technical topics
- Currently working on time tracking web application with phone system (Twilio API) and geolocation. It utilizes React.JS and Meteor.JS as the stack.

EDUCATION

California State Polytechnic University Pomona

B.S. in Computer Information Systems

Coursework included Object-Oriented Programming, Interactive & Responsive Web Development, and much more. I was the leader for my senior project group. We helped an outside company, Neudesic, perform a website migration to a different platform. They liked me so much that they hired me.

Palos Verdes Peninsula High School

High School Diploma

I was the Editor-in-Chief for Web Design and built their site on Joomla
